

We've got enrollment locked up.

iEnroll solutions is the provider of safe, secure, effortless enrollment services. This innovative, cloud based application makes the process of collecting and disseminating subscriber data, clean and simple. Our paperless system is an environmentally neutral process of which you can be very proud. Whether you are a broker, agent, carrier, benefit administrator or an employer, with iEnroll solutions, the i is you.

Employers, Municipalities and Unions

Today's leaner HR teams need a comprehensive, flexible and secure enrollment solution to manage all aspects of benefits enrollment and administration. With iEnroll solutions, your team will benefit from a system designed to be easy to understand and navigate, and from a depth of reporting and communication that is unparalleled. Employees benefit by the clear presentation of their benefit options, simplifying the task of choosing the programs that best meet their needs and budgets.

Brokers/Agents

Increase your business, by becoming a solution provider for your current and future clients with iEnroll solutions flexible, efficient and modular design. With iEnroll as your partner, you will have the tools you need to satisfy every client. From the most complex HR benefits enrollment, administration and communication system to a simple voluntary benefits enrollment tool we have what you need to be successful. iEnroll supports: multiple carriers, agent assisted laptop/tablet enrollment, call center/web-based self enrollments and more.

Carriers

iEnroll is designed for all constituencies that demand efficient, flexible, successful enrollment. We provide a simplistic approach to data gathering for employees, agents and HR teams, coupled with powerful, secure, flexible and complete data exchange system for carriers. All this makes for a seamless, effortless enrollment experience. Behind the scenes, iEnroll synchronizes enrollments in real time across the internet. For times when internet access is not available, iEnroll's innovative technologies will: collect, verify, and batch enrollment data. When internet access is detected, synchronization with your system is completed.
